

QRAFTER.AI

Our Qrafter.ai is an AI-powered programming productivity solution that helps accelerate the development of applications or code components multi-fold

Key Features

- Automated code generation for new code development as well as for migrations
- Integration with agile product backlog management tools such as Jira or Agile DevOps
- Integration with code repositories such as GitHub
- Role/user-specific access to coding tasks for automation
- Ability for developers to add specific instructions to increase automation accuracy

Benefits

- Significantly reduce manual coding effort
- Release applications or code components faster
- Enable new developers to learn new technologies and become productive quickly
- Drive down product/software development costs significantly

FINIX

Finix, our cloud-native Corporate Performance Management solution helps streamline and automate the planning, forecasting and tracking processes for various functions including sales forecasting, expense budgeting and manpower planning.

Key Features

- Dynamically configurable and customizable planning templates for a variety of business processes
- Centralized cloud repository for secure data storage and access control.
- Choice of Excel and Web UI for data management
- Dynamic data updates and roll-ups at a department, business unit and enterprise level
- Intuitive usable design for accelerated solution deployment and adoption
- Built in analytics and real time reporting

Benefits

- Error-free and faster monthly, quarterly and annual planning closing cycles
- Significant reduction in manual effort for data roll-up and reconciliation
- True enterprise performance management with real time reporting and deeper insights
- Accelerated ROI with a single planning and tracking solution for multiple planning areas

VISION SAFEGUARD

Achieve consistent PPE compliance effortlessly with Vision SafeGuard. Our advanced solution uses real-time monitoring to detect the proper use of safety gear, such as helmets, goggles, and gloves, across high-risk manufacturing environments, ensuring improved worker safety and reduced accidents.

Key Features

- Real-time PPE Detection & Alerts to Supervisors
- Comprehensive Safety Compliance Reports
- Automated Violation Tracking & Analysis
- Enhanced Workplace Safety with Measurable Results

Benefits

- Improved adherence to PPE protocols
- Reduction in safety violations
- Decrease in workplace injuries
- Decrease in accident-related downtimes

UNIFIED BOT FRAMEWORK

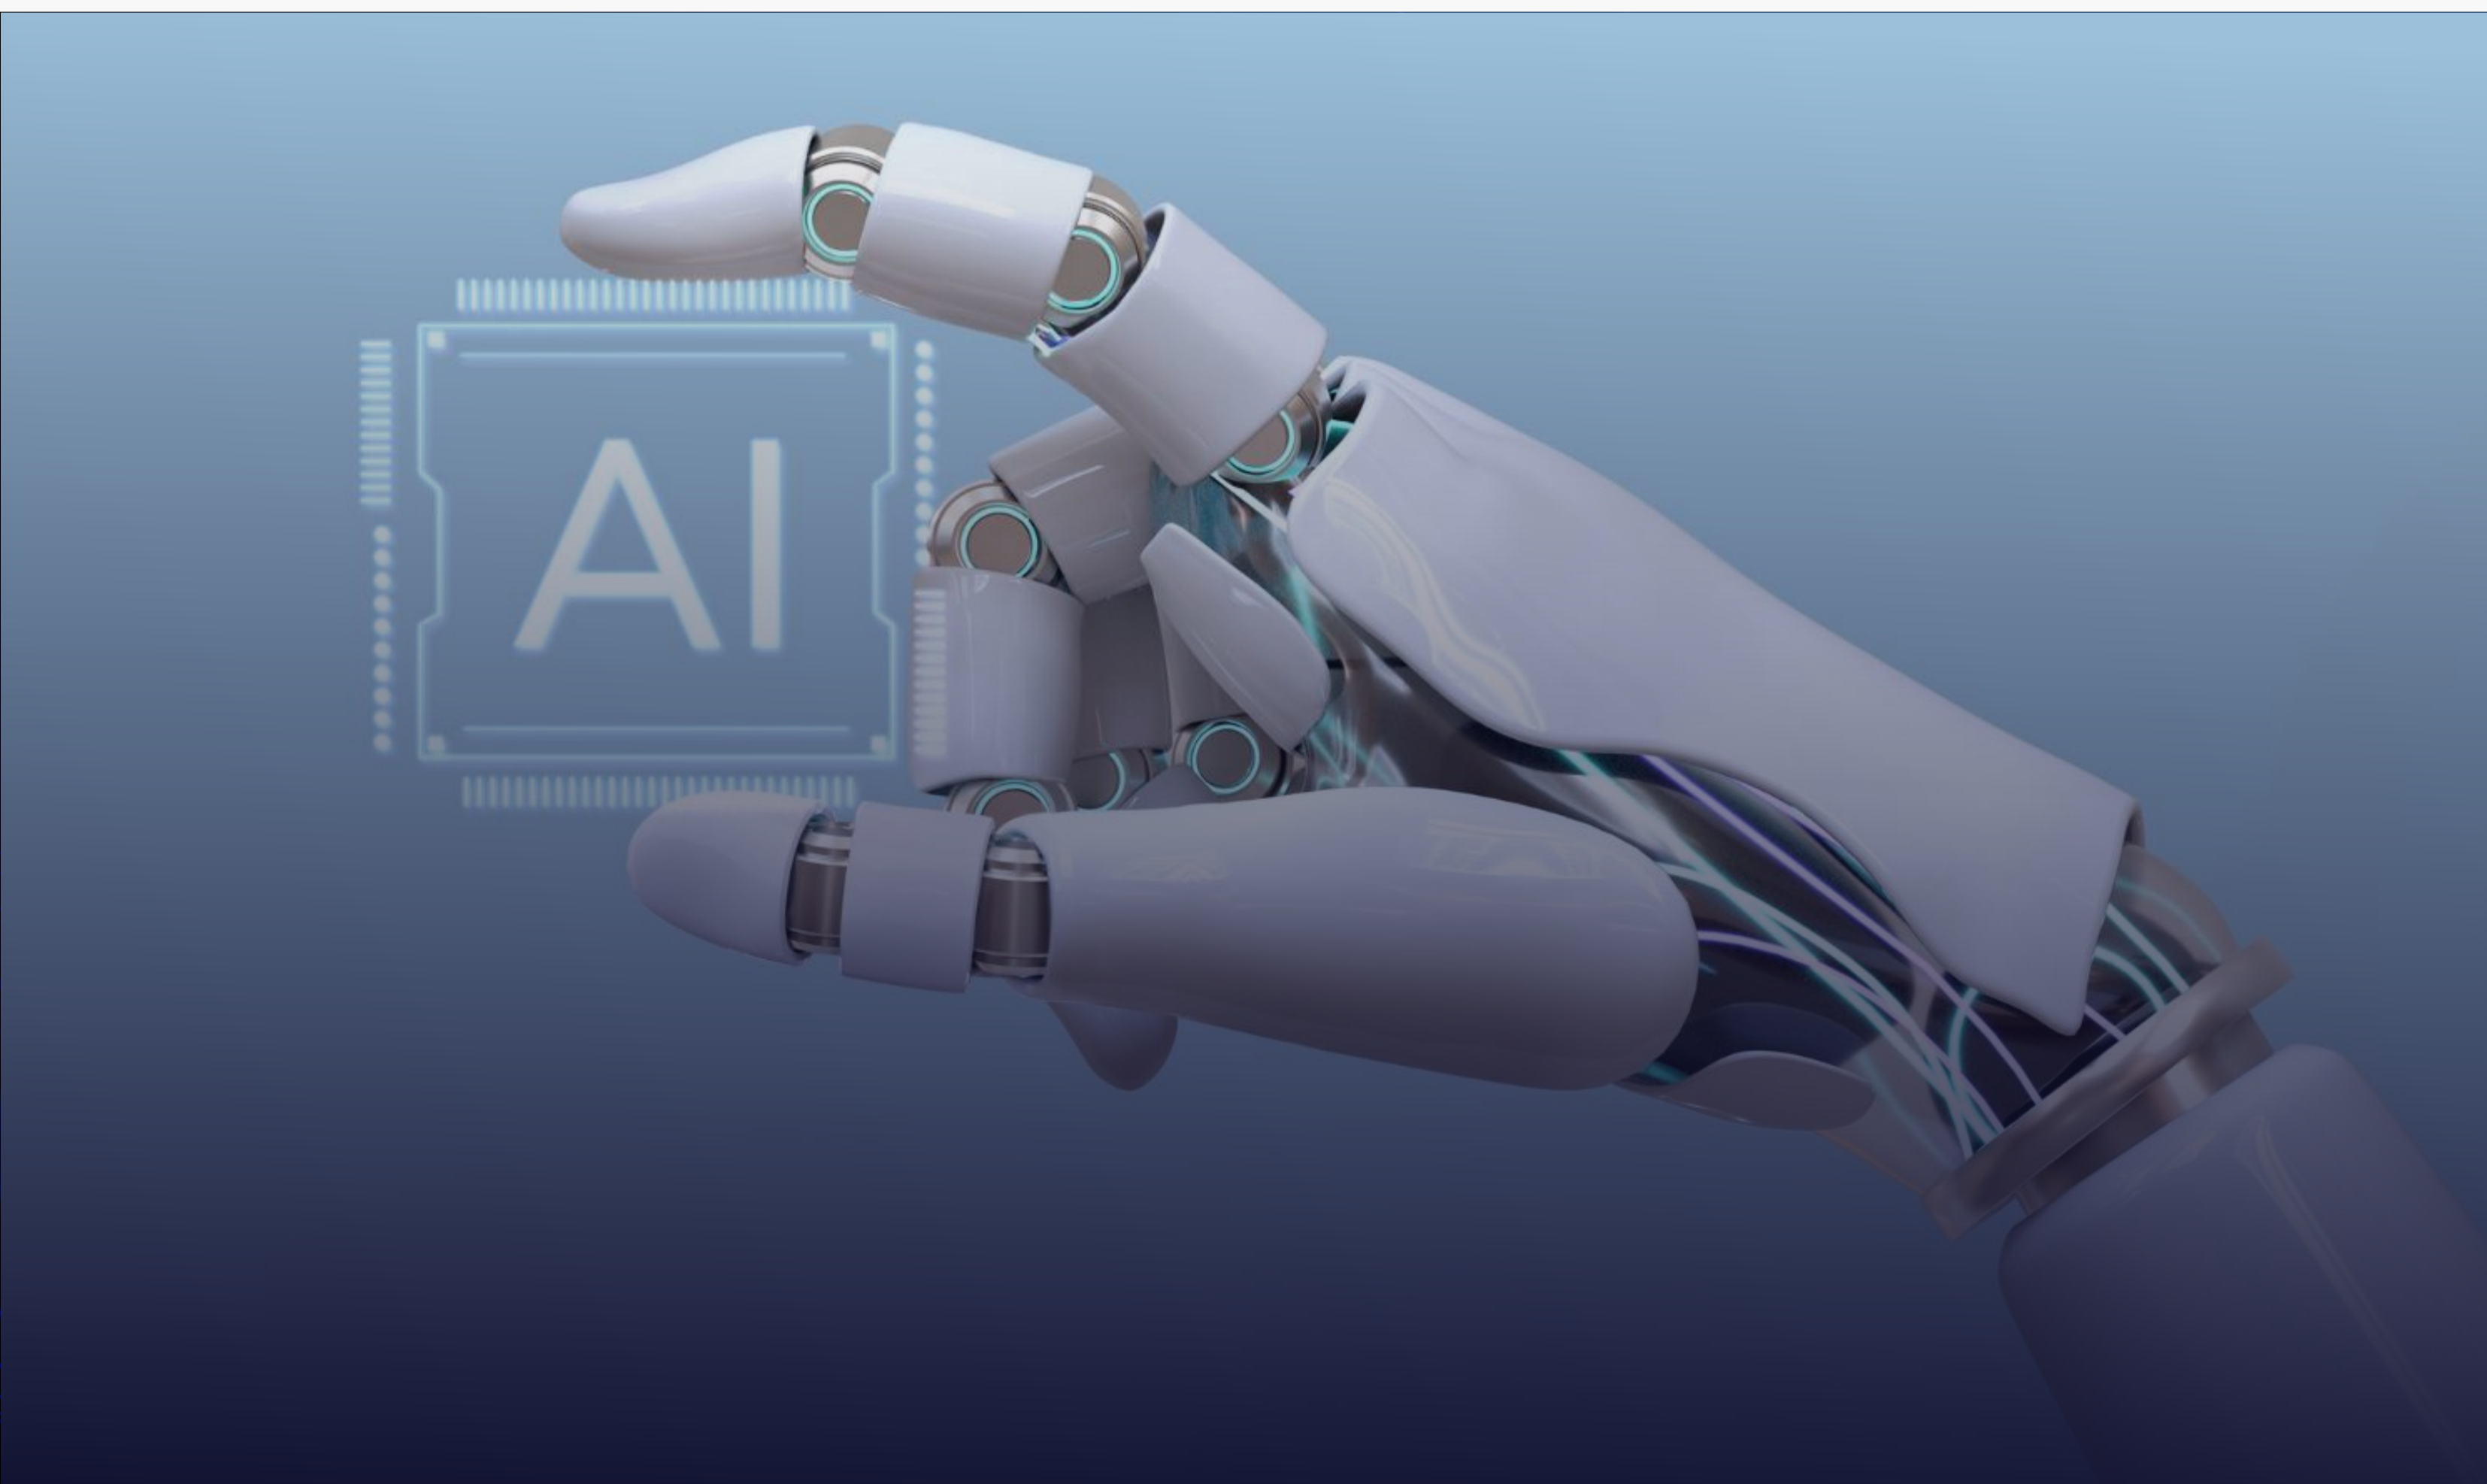

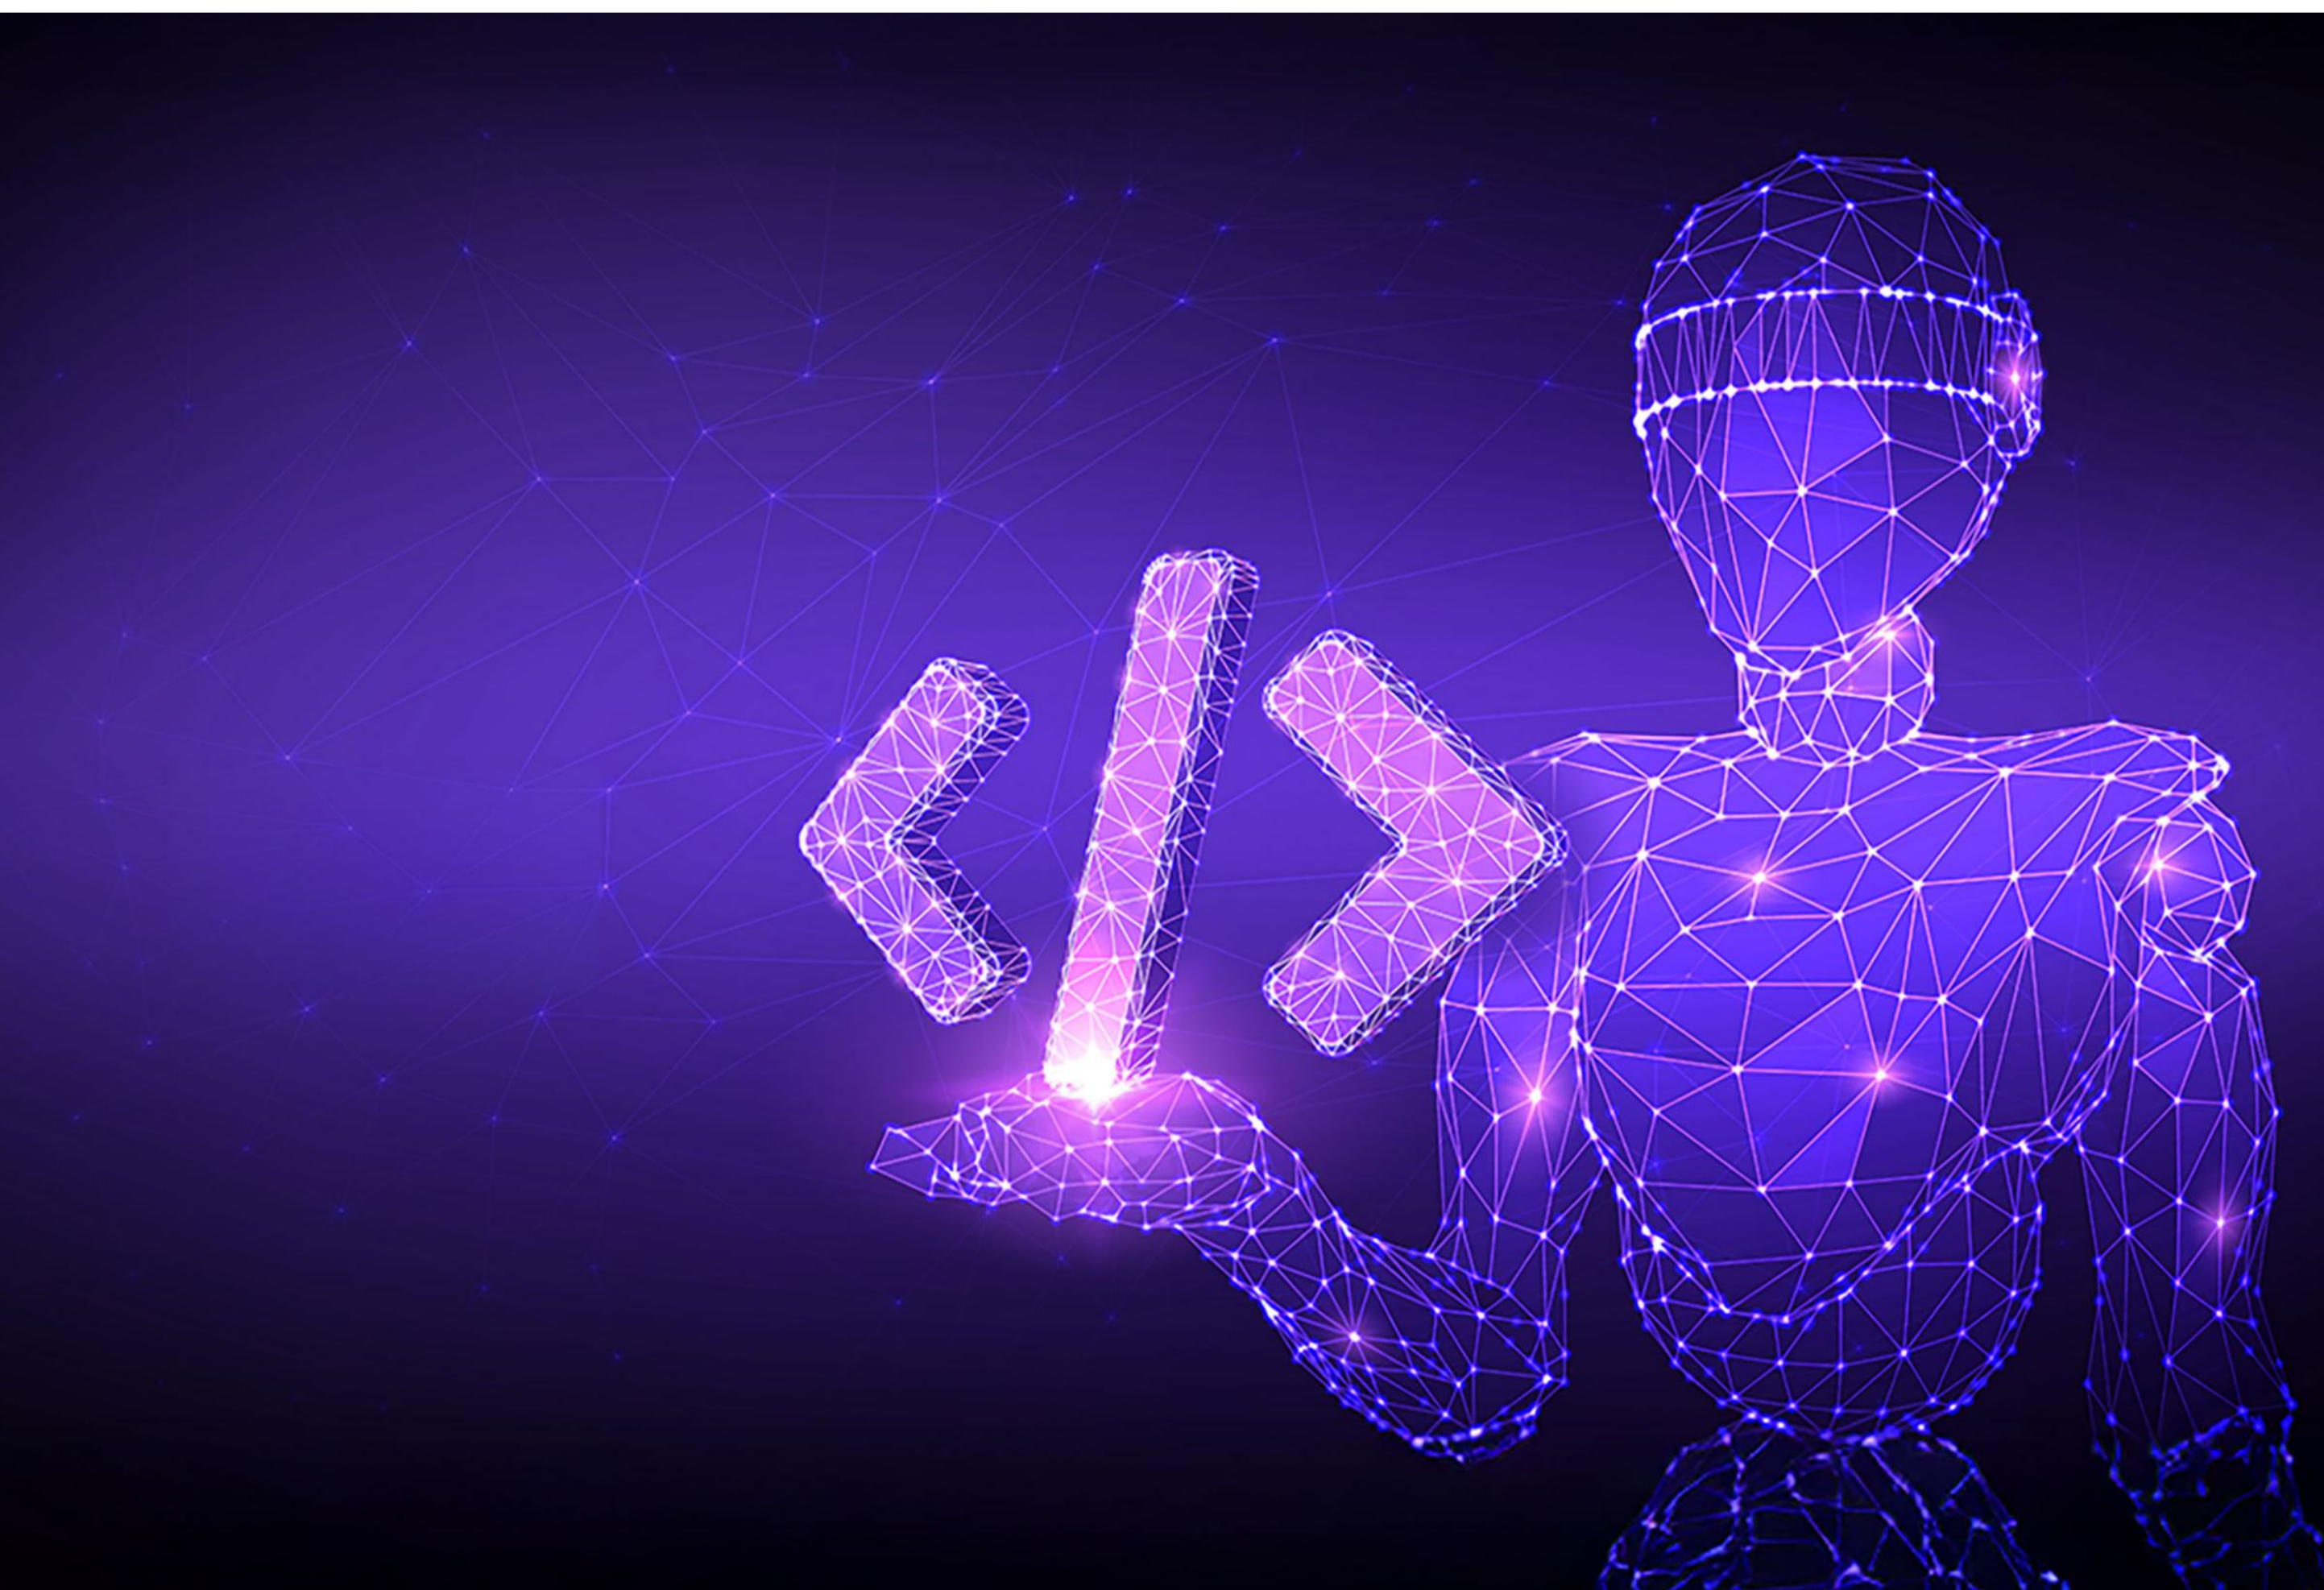

Enhance customer satisfaction and loyalty with the Unified Bot Framework, utilizing cutting-edge tools and techniques in Generative AI to design and deploy multilingual chatbots that engage in a natural and intuitive way. Our platform empowers businesses to deliver seamless, personalized interactions, improving overall experience

Key Features

- Seamless, Human-Like Conversations
- Quicker inception to deployment
- Customizable to Meet Business Needs
- AI-Powered Natural Language Processing
- Handles structured and unstructured data
- Scalable for Multiple Channels and Languages
- Compatible with both cloud and on-premises environment

Benefits

- Increased customer satisfaction and loyalty
- Reduced response times and improved efficiency
- Enhanced customer insights through interaction analytics
- Cost savings through automation of routine inquiries

VIDIOSENSE

Streamline multilingual captioning and metadata generation with Quadrant’s advanced solution. Our automated platform provides real-time captioning, OCR, celebrity recognition, and shot detection to improve content accessibility, categorization, and user experience.

Key Features

- AI-Generated Multilingual Captions
- OCR for On-Screen Text Recognition
- Celebrity Detection for Enhanced Content Categorization
- Shot Detection for Background and Location Identification
- Review and Management Console for Easy Content Oversight

Benefits

- Boost in viewership among non-native speakers and the hearing-impaired
- Improved content recommendation
- Increase in user engagement and longer viewing times
- Enhanced content discoverability and accessibility

PURESIGHT.AI

Puresight.ai is our AI-powered Data Quality Management solution that helps achieve higher data quality and build user trust in data, enabling data driven decision support and AI-led innovation

Key Features

- Connect to a variety of data sources on-premise or on-cloud
- Automated analysis of structures and patterns in unknown or little-known datasets
- Automated generation of text-based and numerical data quality rules
- Data Stewards/Owners can select some or all of the auto-generated rules and to edit the rules
- Automated clean-up of bad data or store bad data separately for a subsequent clean-up

Benefits

- Single scalable AI solution for multiple datasets rather than script-based dataset-specific point solutions
- Dynamically updated data quality rules and cleansing of data based on data structure changes
- Higher data quality leads to accurate reporting and better business outcomes

Q Migrator

QMigrator is an AI based tool for migrating on-prem or cloud databases such as Oracle, SQL Server, DB2 to Open-source databases like PostgreSQL, MySQL or MariaDB in any cloud. Below are the top features of QMigrator to help you migrate your databases quickly.

Key Features

- Preliminary Assessment
- Discovery
- Plan & Decide
- Automated and Manual Migration
- Migration
- Deployment
- Testing
- Reports & Dashboard

Benefits

- End to End Migration Services Professional
- Consulting Services
- Customer Service & Operations

QUADRANT

NEXT GEN SOLUTIONS

enplify.ai

Experience seamless enterprise information integration and achieve unparalleled user experience with our innovative Gen AI solution

Key Features

- Intuitive Chat Interface with Context-aware Conversation
- Integrations with Popular Enterprise Apps via Industry Standard APIs
- Configurable Integration Framework to Add/Change app/data sources
- Interactive Multi-Document Upload, Analysis & Comparison
- Omni-Channel support with voice capability
- Personalized and secure user experience

Benefits

- Instant Answers: Natural language responses to user queries
- Unified Data Access: A single gateway to all enterprise information sources
- Enhanced User Experience: Streamlined access for employees and customers
